PROJECTS

Learning Management System (LMS) Udemy Style Platform   Live Preview   GitHub Link

- Built a full-stack LMS using Next.js, Node.js, Express, supporting course creation, enrollment, and user authentication.
- Implemented role-based access (student/instructor), RESTful APIs, and progress tracking with MongoDB.
- Designed a responsive, production-ready UI and deployed the application on Vercel.

ECommerce platform – Multi Vendor   Live Preview   GitHub Link

- Developed a full stack multi vendor ecommerce application using Next.js, Node.js, Express, supporting vendor onboarding, product listings, and customer orders.
- Implemented secure authentication, role based access (admin/vendor/customer), cart, checkout, and order management workflows.
- Integrated MongoDB for data persistence and deployed the application on Vercel with production ready configuration.
